The Honorable Tom Cole  
Chairman  
Committee on Appropriations  
H-305, The Capitol  
Washington, DC 20515

The Honorable Rosa DeLauro  
Ranking Member  
Committee on Appropriations  
1036 Longworth HOB  
Washington, DC 20515

Dear Chairman Cole and Ranking Member DeLauro:

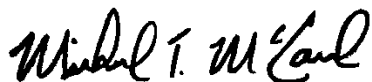

I am requesting funding for Real-Time Evaluation, Improvement, and Manufacturing of 3D Printed Pharmaceuticals in fiscal year 2026. The entity to receive funding for this project is Texas A&M Health Science Center, located at 8441 Riverside Parkway, Clinical Building 1, Suite 3100, Bryan, Texas, 77807, United States.

The funding would be used to enable precise, on-demand drug production using real-time analytical tools to ensure quality, safety, and efficacy at the point of care. This cutting-edge technology would allow pharmacists to tailor exact dosages for pediatric and rare disease patients, populations often underserved by mass drug manufacturing, while also reducing drug shortages and improving treatment outcomes. This project is an appropriate use of taxpayer funds because it leverages cutting-edge, real-time quality analysis to produce precise, on-demand medications, especially for pediatric and rare disease patients, while reducing dependence on foreign supply chains, mitigating drug shortages, and strengthening the reliability, safety, and affordability of our healthcare system.

The project has a federal nexus because the funding provided is for purpose authorized by section 272 of title 15, United States Code.

I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

Sincerely,

Michael T. McCaul  
Member of Congress
